Tower of Tenets

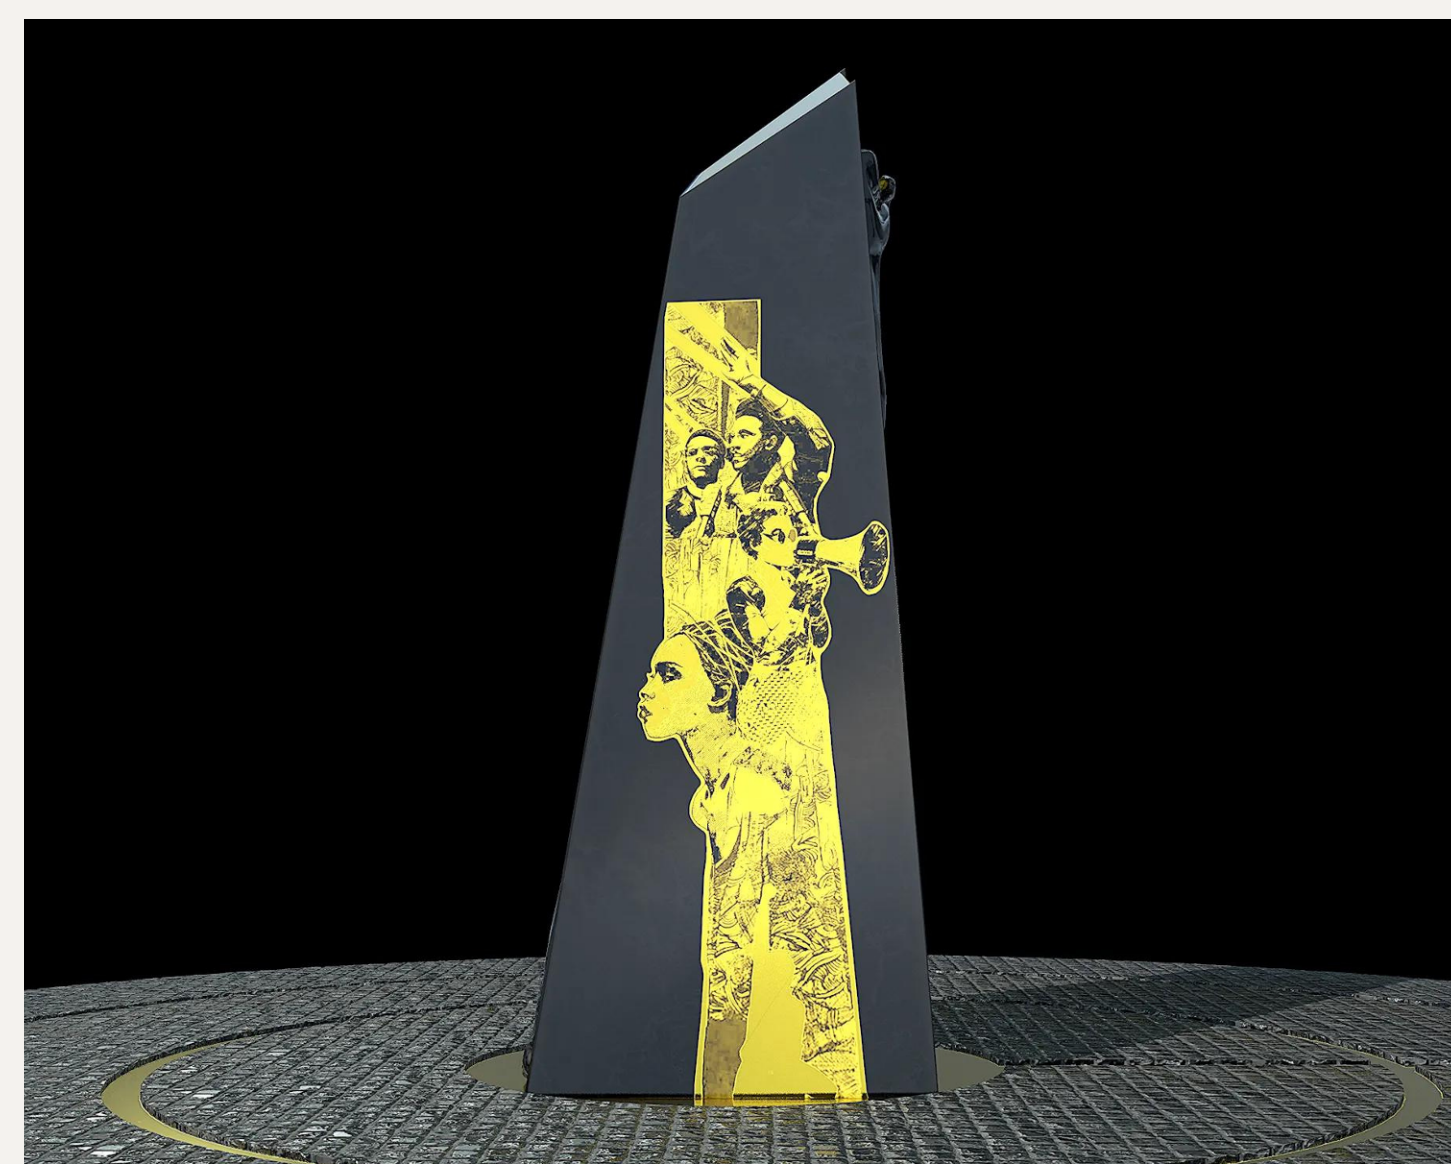

The Tower of Tenets is a monument that serves as an awe-inspiring work of art and a sentinel of history. The black granite obelisk features gold engravings of the founders of the Black Panther Party alongside sculpted renderings of iconic Party symbols: the formidable sitting panther and the Black Power fist. The Tower also immortalizes the ten-point program—the heart and soul of the Panther Party's principles—through an inscription on one of its faces. Surrounding the obelisk are the Rings of Resilience and Resistance, bearing the revered names of Party members who stand as eternal guardians of the tower. As visitors immerse themselves in this powerful journey through Black History, they're not solely observers, but seed bearers that carry the legacy of the Black Panther Party forward for generations to come.
